Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I need my loan approved quickly. • I'm worried the bank will reject me because I don't have credit history.	THINKS • Even though I'm low-risk, the process is slow. • Manual reviews take too much time and may miss important risk signals.
DOES • Submits loan applications online or at the bank • Provides documents for verification. • Reviews multiple applications during peak periods (Analyst/Credit Officer)	FEELS • Frustrated when approvals are delayed. • Worried about rejection if credit history is weak. • Overwhelmed by workload, concerned about defaults
